

Dear Parents/Guardians,

I am excited to have your child in my Science class this year, and I am looking forward to working together to ensure that he/she has a successful year! On the reverse is the course syllabus, outlining the topics and expectations for the class. If you have any questions or concerns, please feel free to contact me via email at buchanana@santarosa.k12.fl.us, or you can call the school and leave a message. If you would like to sign up to receive messages via the remind app, please follow the steps at the bottom of this page (separate codes for regular and advanced classes).

This year we will be using a workbook/textbook combination entitled HMH Florida Science. We will be keeping all books in the classroom; however, students will be tearing out the chapters they need as we work on them and will therefore have the needed book pages in their folder to complete homework and/or absent work. The cost of these textbooks is \$86.30 each, so it is important for students to understand that they are responsible for their assigned book throughout the year. I appreciate you discussing this responsibility with them. Additionally, students will be receiving information on how to access the book online.

Lab and other science-related activities are an important part of science classes at KMS. *In order to be assured that we will have the necessary funds to provide this for your child, we are requesting a one-time lab donation of \$5. This can be paid directly to your child's science teacher.*

With much appreciation,

Angela M. Buchanan

STUDENT: *I will not damage in any way my science textbook and will only tear out & take home any chapter I need to finish. I will follow my teacher's instructions and all safety rules in lab. Also, I will follow the classroom policies, procedures and social contract. I will respect classroom furniture and science equipment and realize that I will be responsible for damages.*

Name: (Print) _____ Signature: _____

PARENT: My child understands the importance of taking care of his/her science book. *I give permission for my student to use the internet as it relates to our units studied in science. I also give permission for them to participate during lab. I understand that he/she will be given proper instruction in lab safety procedures.* Since the safety and education of all students is imperative, failure to follow these rules will result in disciplinary actions and the possible forfeit of lab privileges.

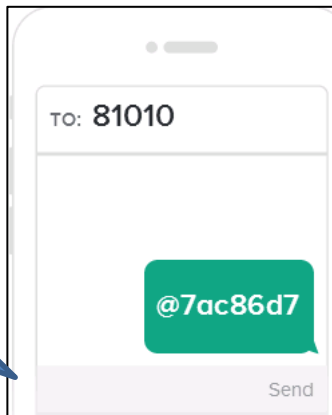

Signature: _____ Date: _____

_____ \$5 lab donation is enclosed.
